

Leadership Programme for Sustainable Waste Management

Building the Next Generation of Waste Management Leaders

Apply here:

www.sustainabilitycentre.lbs.edu.ng/lp-swm

About the programme

Globally, the waste management industry is increasingly moving from a conventional approach to sustainable and innovative ways of managing waste. With this approach, the industry is becoming a lucrative and revolutionary industry in many countries. However, in Nigeria, there is a dearth of professional training programmes on sustainable and innovative waste management to facilitate the growth of the industry.

The Programme is designed for youths (within the age bracket of 18 to 40 years) working in the waste management industry. This demographic of participants are looking to build business and leadership skills to effectively manage the peculiar technicalities and the business aspects (finance, technology and human resources) in the sector. The programme should also facilitate the entry of informal youth-led waste management businesses into the formal economy in a manner that improves their business reputation and potential for expansion and growth.

This programme is supported by the Aspire Coronation Trust (ACT) Foundation.

Duration:
6 Weeks

Start Date:
Tuesday, August 4, 2026

Programme Delivery
Hybrid (Online and In-Person)

Fees:
N400,000

Programme Modules

Modules will include:

- Stepping up to Leadership: Ethics, Profits, and Impact
- Circular Economy and Waste Prevention in Emerging Markets
- Duty of Care: Waste Legislation, Regulations, and Compliance
- Socio-Environmental Impact in Waste Management
- Managing Waste Projects for Sustainability

Key Learning Outcomes / Takeaways

- Understand key concepts and principles of sustainable waste management and what a circular economy means for businesses in emerging and developing economies
- Gain knowledge of relevant regulations/legislation, standard procedures, best practices, ethical and social aspects of waste management in Nigeria
- Apply business and leadership skills to effectively manage finance, technology and human resources in waste management
- Examine the complex nature of waste generation, treatment, disposal and monitoring within the value chain

Target Audience

The programme targets youths aged 18 to 40, including entrepreneurs and employees in waste management companies, government and nonprofit waste departments, and managers or operators of waste systems. It also caters to sustainability, CSR, and HSE professionals seeking to strengthen their leadership and business skills in sustainable waste management.
